SUDHEER TUMKUR SHYAM

+1 669-213-7158 | sudheer.tumkur@gmail.com | LinkedIn | San Jose, California

PROFESSIONAL SUMMARY

- **20+ years of IT Leadership**: Accomplished IT professional with extensive experience in software engineering, program management, and cloud infrastructure across Retail, Telecom, Life Sciences, and Healthcare.
- **Digital Transformation & Cloud Expertise**: Lead multiple digital transformation initiatives, including complex on-premises to cloud migrations heavily leveraging AWS to deliver significant business value.
- **Large-Scale Team Management**: Managed 6 cross-functional Scrum teams (80+ professionals) to successfully deliver complex, scalable, cloud-native solutions.
- **Financial & Business Impact:**
  - Achieved $1.6M/year in cloud cost savings through AWS infrastructure automation and multi-cloud optimization strategies.
  - Reduced business refunds from $2.3M to $1.9M by leading data analytics and ML-driven substitution logic enhancements.
- **AI/ML Development**: Led the development and deployment of AI chatbots and ML-powered engines using the Azure BOT Framework and LUIS.
- **Technology Stack**: Deep expertise in AWS (including multi-cloud deployment), .Net, Azure ADO, Kubernetes/Docker, Terraform, Informatica, and Microsoft Dynamics 365.
- **Project & Process Mastery**: Proficient in Agile, SAFe, Scrum, and end-to-end project management, ensuring technical strategy aligns with strategic business goals.
- **Global Leadership & Collaboration**: Strong communicator and leader skilled in mentoring, team building, and successful global stakeholder collaboration across North America, Europe, and Asia

EDUCATION

- **Bachelors of Engineering - Computer Science Engineering (2003)**

CERTIFICATION

- **AWS Certified AI Practitioner,** Amazon Web Services
- **PMP** – Project Management Professional, PMI
- **CSM** – Certified Scrum Master, Scrum Alliance
- **AWS Certified Cloud Practitioner**, Amazon Web Services
- **Python for Data Science**, AI & Development, IBM
- **Google AI Essentials**, Google
- **SAFe – Scaled Agile**, Scaled Agile

TECHNICAL SKILLS

- Cloud: AWS (SageMaker, API Gateway, Lambda, Athena, QuickSight), Azure (Health Bot, IoT Hub, DevOps)
- Languages: Python, SQL,Perl,Shell Scripting
- Automation: RPA, Low-Code/No-Code, REST APIs, Webhooks
- ML & AI: Model Training, Recommendation Systems, Edge AI
- Data & Visualization: AWS Athena, QuickSight, Databricks
- Project Tools: Jira, Confluence, Azure DevOps, SAFe, Agile

SUDHEER TUMKUR SHYAM

PROFESSIONAL EXPERIENCE

Technical Program Manager | USM Business Systems (September 2021 – Present)

Key Client Engagements:
Walmart Global Tech – Technical Program Manager (Sunnyvale)
04/2024 – 08/2025

- **Financial & ML Optimization**: Reduced international refunds (Mexico, Chile, Canada, USA) by 23% (from $2.34M to $1.8M) by leading initiatives to enhance substitution accuracy using AWS SageMaker for ML model refinement and RPA bots for automated error correction.
- **Global Program Leadership & Release Management**: Orchestrated the entire release cadence for a critical One-Time Password (OTP) app across Mexico, Canada, and Chile, coordinating 6 cross-functional Scrum teams and utilizing AWS CI/CD (CodePipeline, CodeDeploy) for secure, region-specific deployments.
- **Unified Cloud Platform Development**: Led the development and alignment of a common substitution and automation platform structure across four international regions, ensuring operational consistency at Walmart warehouses and stores.
- **Customer-Centric App & Tracking Systems**: Led the development of consumer-facing mobile apps and chatbots (AWS/Azure) enabling real-time package tracking. Integrated live shipment updates from internal (Walmart) and external shippers (FedEx, Clickpost) using webhooks and AWS API Gateway.
- **Project Delivery & Process Automation**: Accelerated project implementation cycles by 25% through streamlined global planning with Azure DevOps. Managed substitution and automation projects using Jira, reducing manual interventions by 40% via RPA integration.
- **Data-Driven Innovation & Strategy**: Led the enhancement of the substitution ML engine for global markets (AWS/Azure) and delivered actionable performance insights to leadership via AWS QuickSight, establishing KPIs and leveraging AWS Athena/SageMaker for data-driven optimization.

Kodiak Science - Digital Transformation – Technical Program Manager (Healthcare)
03/2023 to 04/2024

- Accelerated trial data access by 45% through hybrid Azure–AWS architecture integrating Azure Health Bot, S3, and IoT feeds for 300+ clinical trial assets (GLOW2/DAYBREAK).
- Cut IT infrastructure spends 90% ($1.5M → $95.6K) via Azure DevOps migration and multi-cloud automation, ensuring HIPAA/FHIR compliance.
- Delivered Azure–AWS conversational bot 3 weeks early under budget, automating trial data capture with CloudWatch monitoring and agile sprints.
- Collaborated with product and engineering teams to refine bot capabilities and extend features for conversational flow management and workflow orchestration.
- Mentored technical consultants on reusable automation patterns and compliance-first design principles to ensure scalable implementations.

- Increased data accuracy to 98% and improved trial eligibility matching by 30% through semantic search integration (Azure Trial Matcher).
- Produced SOWs, RFPs, and CPARs; led governance and executive reviews to maintain transparency, compliance, and delivery predictability.

AT&T - Cloud Infra – Engineering Manager (San Jose)

09/2021 to 03/2023

- Led the development and implementation of an automated continuous build process, streamlining the review of
- source code, identification of build errors, and notification protocols to ensure prompt synchronization with the latest build.
- Orchestrated version control activities, including strategic planning of branching and merging strategies, as well as maintaining user group permissions for efficient project collaboration.
- Directed the deployment of applications to App Service and virtual machines (VM) through effective management of DevOps release pipelines, ensuring timely project milestones and successful deliveries.
- Manage ETL pipelines with Azure Databricks to populate the Azure Data Lake
- Functioned as a pivotal liaison between clients and project teams, facilitating productive requirements gathering sessions, and maintaining seamless communication channels between onshore and offshore stakeholders.
- Managed the scheduling, coordination, and deployment of Docker containers using Azure Kubernetes Service (AKS), optimizing resource utilization and ensuring seamless application deployment

Infinite Computer Solutions - DevOps – Lead Analyst (San Jose)

Client: GE HealthCare

06/2021 to 09/2021

- Successfully orchestrated the transition of a legacy monolith application to microservices on AWS while seamlessly integrating with test automation
- Managed the infrastructure stack with 3 teams in parallel and automating the entire workflows without impacting existing workflows
- Lead cross functional meetings, milestone reviews, communicated schedule changes and presented project status to the executive team

Aris Global - Project Manager (Info science)

07/2017 to 02/2018

- Successfully executed a high-impact AWS migration project, consolidating the onboarding of 8 clients from diverse geographical locations onto the AWS platform, showcasing exceptional project management, technical prowess, and global coordination
- Collaborated closely with regulatory authorities, obtaining necessary approvals and ensuring compliance with data security regulations for AWS
- Conducted comprehensive assessments and formulated strategic migration plans tailored to the unique requirements and workloads of each client
- Managing a budget of over $3 million and successfully completing transition and security projects, while ensuring compliance with industry standards such as SOC II and ISO 27001

SUDHEER TUMKUR SHYAM

Zensar – Engineering Project Manager

05/2015 to 06/2017

Client: Cisco

- Successfully managed the security and vulnerability team at Cisco for the acquisition of Webex, ensuring compliance with the BAVA (Basic Application Vulnerability Assessment) and DAVA (Deep Application Vulnerability standards
- Involved in the Design of Automated system for Vulnerability checks for the code during the integration and deployment
- Conducted monthly review calls with Directors and VPs from various cisco departments and geographic regions

Accenture - Associate Manager

07/2006 to 03/2015

Clients: AT&T, Cisco, VMware, SFR – France

- Over the course of my 9-year tenure, I transitioned from a developer role to a managerial position
- Developed a standalone wrapper to automate batch processes for Informatica, and conducted training sessions on its use for the AT&T team in Austin.
- Designed and implemented comprehensive automation solutions for data ingestion, integrating external systems via multiple protocols.
- Served as Integration System Architect for various clients, ensuring robust and scalable solutions.
- Played a key role in the merger of BellSouth with AT&T, overseeing the seamless transition of both technology and operations.
- Successfully coordinated offshore and onshore teams, enhancing communication and collaboration.
- I had the opportunity to travel to the US and Europe to implement solutions, collaborating directly with international teams and stakeholders. These experiences not only enriched my technical skills but also broadened my understanding of global business practices and cultural dynamic

Symphony Services - Senior Software Engineer

06/2004 to 07/2006

- Worked as Infrastructure Automation Developer for the SIEBEL(CRM)
- Created Automated Perl installation scripts for Multiple OS platform and created automated deployment testing

Edge Value - Systems Engineer

06/2003 to 07/2004

- Developed Infrastructure automation tools to streamline deployments
