SHASHANK

LEAD ENTERPRISE ARCHITECT

Cumming, GA

PROFILE SUMMARY

- Highly competent SAP Lead architect with over 17 years of SAP RISE Migration, BTP, S/4 HANA/ECC/R/3, SCM, APO, NW experience in Manufacturing, Automotive, Utilities and Semiconductor sectors.
- Experience in Enterprise Architecture roles & responsibilities: IT strategy alignment to business goals, Long-term strategic roadmap of company's IT systems, Comprehensive knowledge of hardware, software, application, and systems engineering, Architecture Review Processes, SDLC Processes, Development of policies, standards and guidelines, Opportunity Assessment and Project Sizing
- Experience in architecting, design, development, testing, and deployment of many critical enterprise applications
- Knowledgeable and familiar with emerging technologies concepts (PaaS/IaaS/SaaS, Open Source, Cloud)
- Highly result oriented People Leader with 100% on time delivery with high quality by optimizing the process and implementing SAP best practice over 17 years.
- Received several awards from Senior Leadership throughout the career such as Award of Excellence, You Make the Difference, top talented individual and on time delivery.
- Provide creative solutions to complex business problems while maintaining best practices.
- Support the services sales opportunities as the solution and technical leader working with the Account Executives and Client Partners
- Enterprise Architecture Alignment: Apply TOGAF-based architecture principles to ensure scalable, compliant, and sustainable designs aligned with long-term business and IT strategy.
- 3PL & Supply Chain Integration: Designed and integrated real-time connectivity with Third-Party Logistics (3PL) providers for automated order fulfillment, shipment tracking, and parts inventory synchronization across global networks.
- Agile Delivery & Project Management: Devise effective project plans from inception to completion, maintaining alignment with business goals and identifying innovative technology solutions that drive process improvement and organizational transformation.
- Risk & Execution Management: Proactively mitigate potential risks to ensure prompt and efficient project execution while ensuring scalable, compliant solutions in partnership with Enterprise Architecture.
- Integration & Data Engineering: Build event-driven data flows using SAP PI, Sterling, OpenText, GDS, Seeburger, Linux script, secure File transfer externally,OMS, Vertex, Kafka, MuleSoft, and EDI services for seamless enterprise integration.
- Data Modernization: Optimize real-time pipelines with Databricks, Fivetran, and Oracle GoldenGate for high-performance ingestion and analytics.
- Azure Cloud Platform: Lead on-prem to cloud migrations using Azure Gateway, Azure Key Vault, APIM onboarding, and subscription management; design high availability setups spanning US East and US Central for disaster recovery with multi-instance load balancing.
- Database Transformation: Manage end-to-end Oracle to PostgreSQL migrations with schema conversion and performance tuning.

- Automation & Operations: Oversee Tidal batch processing, firewall configurations, and CI/CD enablement via App Code for optimized deployment.
- Agile Management Tools: Deliver sprint-based development and story point estimation using JIRA for consistent, high-quality releases.
- Strong technical experience in Implementations, Enhancement/version Upgrades, Migrations, Sizing and Support activities.
- Extensive knowledge and worked very closely with various team to do proper architecture definition and system sizing during on Prem to Rise SAP system migration and ongoing system capacity increase and system tuning/optimization.
- Extensive knowledge in UNIX (Solaris, HP UX, AIX, Linux), Windows, HANA, Oracle, DB2 and SQL server
- Extensive experience in SAP/database refresh, System migration (Homogeneous/Heterogeneous), SAP/NW upgrade, system build, client copy, applying Support Packages, Kernel Upgrade, OSS, Plugins, CTS, Client/Users Maintenance, Printer/Spool administration, Daily/weekly/monthly production monitoring and support.
- Expertise in installation, configuration, upgrade, conversion, migration, support and administration of S/4 HANA, SLT, SAP ECC 6.0, R/3/ (4.7), BW/BI 7.0/7.3, BI portal 7.0/7.3, EP 6.0/7.0/7.3, BOBJ 3.1/4.0, BODS, APO, SCM, SRM, XI/PI, CRM, GRC, MDG, Solman.
- Strong experience in implementing SAP systems following ASAP methodology. Involved in all phases of implementation and played a pivotal role.
- Expertise in setting up Production systems on High Availability (HA) and Disaster Recovery.
- Strong experience on Migration using Database Migration Option (DMO) of SUM.
- Perform database administration: Database installation/upgrade/refresh, online backup, offline backup, restore, recovery, database check, optimizer statistics analysis, create statistics for the tables and indexes, tablespace monitoring, add/resize data files, add and change table extents size and number Using DBA Cockpit, HANA Studio, Brtools/SAPDBA. BRBACKUP and BRARCHIVE tools experience in online database backup and archive redolog files.
- Expertise in online and Offline table reorganization using SAPDBA: Analyze tables and tablespace. Manually change various parameters for reorganization depends on total of records and size of the tables.
- Analyze each PRD, DEV, QA and training system every month. Prepare documents and reports about system growth, database growth, tablespace growth, burn rate due to archiving, calculate tablespace fragments and administrate Database accordingly.
- Performed several HANA, Oracle and Linux upgrades as part of year end support package upgrades.
- Extensive working knowledge on Business Continuity and Disaster recovery plan and testing.
- Extensive experience in providing support Production systems on distributed, clustered and on High Availability (HA).
- Excellent communication and interpersonal skills, and the ability to interact and collaborate with other functional/technical teams including application development, testing, operations, and project management office as well as business customers and external vendors.
- Strong leadership experience in Project Management, Resource/People management and IT Operational management with proven abilities in leading teams towards achievement of product and organizational goals
- Extensive experience in project planning, execution, and delivery of projects successfully within the stipulated timelines

WORK HISTORY

Senior SAP Basis Administrator, Lead, Architect, 11/2013 - Current

General Motors – Atlanta, GA

- Defined and developed Aftersales 3–5 Year Applications Roadmap and current/future state architecture models for enterprise alignment.
- Authored the Business Opportunity Assessment Document (BOAD) to evaluate business capability investments.
- Evaluated and selected emerging technologies for inclusion in IT solution designs, ensuring architecture scalability and innovation.
- Established governance with cross-functional business and IT leaders to manage roadmaps, project prioritization, and capacity planning.
- Mentored teams on implementation methodology, bottleneck resolution, and performance visibility across leadership tiers.
- Drove user adoption through proactive go-live transition management, business readiness assessments, and hypercare closure.
- Migrated ECC, BW, PI, Portal, SRM, MDM, BW, and CRM system from IBM to GM data center
- SAP EWM 9 implementation for Europe warehouse plants
- SAP EWM 9.4 implementation for MI Warehouse distribution center
- Implemented and configured DR/FO for new implementation and migration of Prod systems
- Led the technical team during On-Prem to Microsoft Azure Cloud RISE lift-and-shift migration, ERP to S/4 2021 conversion, as well as Greenfield and Brownfield S/4 builds and migrations.
- ECC 5 to ERP 6 EHP7 upgrade for Global Warranty application
- SAP Support pack upgrade for ERP 6 EHP 7, CRM 7, SCM 7, Portal, SRM 7, MDM Catalog, BW
- SAP System refresh for preprod, training, UAT, test and sandbox environments
- Responsible for HTTPS and SSL configuration throughout the landscape. Performed Web Dispatcher installation, load balancing, SNC, and SSO setup for multiple SAP landscapes
- Configured SAML 2 based SSO authentication for SAP JAVA systems
- Adobe document service configuration on SAP ECC & portal system
- Configured and maintained STMS across all the SAP landscapes
- Create client and client copy to support project and training activities
- Installed EP Portal 7.4/7.3 and performed system copies using export/import and standard SAP installation methods. Administered STMS configuration across the landscape
- HPOM server and client software installation to support barcode printing for SAP systems
- Configured and updated SSL certificates for ABAP and JAVA system
- Supported RF gun PSION OMNI XT15, TSC8000, Honey Thor VM1C
- Setup and configured SAP DR/FO of all SAP system on Power 8 with HA (Oracle DB)
- Setup and configured SAP DR/FO of all SAP system on SUSE Linux 11.4 HA with (HANA 1)
- Proactively monitored jobs, and reports to identify long-running jobs, evaluate efficiency improvement opportunities and coordinate with departments, such as Development and Testing, to expedite changes
- Troubleshoot day-to-day problems, verification of ABAP Short Dumps and System logs
- Memory management and buffer parameter review and updates

- Worked Analyzed and fine-tuned on various performance related issues
- ITSM tickets and P1/P2 incidents on priority and timely basis
- Worked on effectively load balancing issue for various prod system depending on function/interface/user group
- Worked with Infrastructure team to determine server requirements in terms of memory & CPU resource, network interface, disk/luns/partitions, user access, TAP updates
- Worked with BUR/DBA/Hosting/Storage teams for various backup/Archive or system restore issues
- Led implementation and optimization of SAP landscape, enhancing system performance and improving user experience across departments.
- Managed system upgrades and patching processes, ensuring high availability and minimal downtime for critical business operations.
- Collaborated with cross-functional teams to streamline processes and integrate SAP solutions, driving operational efficiency and productivity.

Environment: SAP 46c, ECC 5, ERP 6 EHP X, BW 7, Portal, SLT DMIS 14, SRM 7.0, CRM 7, SCM 7, SCM 7.4, Live Cache., Trex, EWM 9, EWM 7, MDM, Oracle 9, 10, 11, 12, HANA 1, 7.0, Solution Manager 7.2, AIX 5.1, Aix 6.1, Aix 7.2, Win 2012, HPUX 11, Linux 11, Linux 12, TFS, MS Teams, ITSM, ISTRC, ONAPSIS, Winshuttle, EY Smart Exporter

Senior SAP Basis Administrator, 06/2010 - 11/2013

Dell – Atlanta, GA

Client – Graphics Packaging International

- ECC 6 Enhancement pack upgrade (EHP6) using SAP SUM tool on ABAP stack
- BW Enhancement pack upgrade (EHP1 & EHP2) using SAP EHP installer tool on ABAP+JAVA stack
- Operational Support for Production on-call, incident management, and for weekly changes
- Responsible for maintaining and monitoring all the production instances
- Support Stacks upgrade for ECC, BW, SRM, CRM, CE, EP, SOLMAN, HCM & SCM
- Java support pack upgrade using JSPM, SDM & CE Update
- HRSP patching on HCM landscape bi-yearly and HCM TUB's update on SAP HCM
- Support stack patch installation on NW CE, MII using CE Update Manager
- SAP Application Server Build for Disaster Recovery & Hardware Failover HACMP
- System refresh and post refresh activities, remote and local client copy and administration
- Mass User creation, role & profile assignment with SCAT
- Spool administration, setting up new printers, installing device types, and format types
- Diagnostic Agent, SAPJVM, Host Agent installation on AIX & Windows
- Installed and Configured Solution Manager 7.0. for System Monitoring, Maintenance Optimizer, EWA reports

- Installed and Configured Solution Manager Diagnostics (SMD) in the landscape and Installed Wily Introscope 8.0 for End-to-End Root cause analysis of Java Stack
- Oracle installation, interim patch, upgrade and CPU patches
- Table space administration using BRTOOLS and maintained Restore/Recovery procedures.
- Create and schedule shell scripts using CRON
- Oracle Installations, Oracle Upgrade, Oracle Interim/CPU patch application
- SQL Execution Plans, SQL Profiling, Tablespace Maintenance
- Buffer parameter performance tuning of ABAP and JAVA systems
- Set up Alert Monitoring system for oracle database using cron & shell scripts
- Monitor and analyzed system performance using Workload Monitor
- Analyze & implement recommendations from Early Watch (EWR) and SAP Remote Performance Optimization (RPO) reports, Data Volume management report (DVM), and Security Optimization Report (SOS)
- Perform monthly Vertex software update on windows environment
- Managed SAP systems performance and availability, ensuring optimal operation and immediate issue resolution across environments.
- Conducted regular system audits and performance tuning initiatives, resulting in increased system reliability and improved compliance with industry standards.
- Collaborated with cross-functional teams to optimize SAP configurations, driving operational efficiencies and aligning system capabilities with business requirements.
- Streamlined SAP transport management processes, reducing deployment times and improving overall project delivery timelines across multiple initiatives.
- Environment: ECC6.0, BI 7.0, EP 7.0, SRM 5.0, MDM 3.0, Solution Manager 7.0, AIX 5.1, Aix 6.1, Win 2005, Win 2008, Wily Introscope 8.0, Remedy, Taxware, Sales Tax Q Series, Winshuttle, Vertex, Redwood, Clear Quest

SAP BASIS Administrator, 09/2008 - 05/2010

Accenture

Client – Reliant Energy (NRG) US | ASMS Netherland

- System refresh & kernel upgrade for QA, training & sandbox environments
- Implemented support package on SAP R3, BW, CRM, SRM and Portal landscape
- Maintenance Optimizer to download Kernel and Service packs
- Worked on weekly releases and imported transport in a timely and effective way
- SGEN, scheduling Background jobs, database backup jobs, operation modes
- Config tool and Visual Administrator to set different parameters for Java stack
- Create user, lock/unlock user, create and transport roles/profile, and generate profiles
- Performed EP 7.0 Administration, UME Administration

- SPAD printer configuration, Transport Management configuration
- Kernel, plugin, ST-PI and API patching in ECC, SRM, portal, BW, XI and CRM system.
- Configured SSO connections between EP, R/3, BW, & CRM
- Performed daily System Monitoring, Alert monitoring using Performance tuning
- Memory and Buffer management and Operation modes maintenance.
- Java Stack administration and performance tuning of EP systems using Solution Manager Diagnostics (SMD)
- Analyzing Early Watch report and SAP Remote Performance Optimization (RPO)
- Database administration, verifying daily DB backups and archive log
- Oracle installation, interim patch, upgrade and CPU patches
- Table Re-orgs, Index rebuilds, Materialized views, DB Table statistics.
- Implement Oracle Critical CPU Patch for SAP landscape
- Archiving in IS-UCCS module using SARA for IXOS based server
- Update/maintenance of Trillium, Taxware, Code1, and Geotax
- Environment: SAP R3 - 4.6c, ECC 6, BI 7.0, CRM 5.0, SRM 5.0, SCM 5.0, Solution Manager 7.0, EP 7.0, PI 7.0, TREX, DB2, Oracle 10.2, MS-SQL 2005, Aix 5.1, Sun Solaris, HP-UNIX 11.0, Windows 2003, Remedy, Vertex, Geo Code, Code1, Taxware

EDUCATION

Bachelor's in Computer Science and Engineering, Dharmsinh Desai University – India, 2008

Master of Business Administration, Georgia Institute of Technology - Atlanta, GA, 2019
