SUMMARY

- Data Analyst with **5+ years of experience** supporting data-driven decisions across **healthcare, retail, logistics, supply chain**, and **IT sectors.**
- Proficient in **SQL** (including **SQL Server, Oracle, MySQL, PostgreSQL**) for querying, data extraction, and optimization.
- Skilled in **Python** and **R** for data analysis, automation, and reporting, with experience with libraries using **Pandas, NumPy, Matplotlib, and Seaborn** for exploratory data analysis and visualization.
- Applied **statistical techniques** and **trend analysis** to support forecasting, anomaly detection, and operational insights.
- Built interactive dashboards and reports using **Tableau**, **Power BI**, **Excel**, and **Power Query** for decision-making.
- Developed **ETL workflows** using **SSIS** and created automated reporting with **SSRS** to reduce manual processes.
- Experienced with cloud data warehouses including **Snowflake** and **AWS RedShift** for scalable analytics.
- Leveraged **SharePoint** and **Excel** to manage reporting workflows and improve team collaboration.
- Adept at translating complex datasets into **actionable insights** for both technical and non-technical stakeholders.
- Proven ability to **streamline reporting**, **improve data accessibility**, and **enable data-informed decision-making.**

TECHNICAL SKILLS

Programming Language: Python, SQL, R, SAS

Frameworks & Tools: Pandas, NumPy, Matplotlib, Seaborn, Plotly, PyTorch, TensorFlow, PyCharm, RStudio

Data Visualization: Tableau, Power BI, Advanced Excel, Looker Studio, QuickSight, Mini Tab

Databases: Oracle, SQL Server, PostgreSQL, MySQL, Snowflake, SSMS, SSIS

Cloud Platforms: Azure (Blob Storage and data Lake Gen 2, Azure Data Factory), Microsoft Power Apps, Power Automate, AWS

AWS Services: S3, Glue, Redshift, Lambda, EMR, RDS, Athena, Kinesis, Data Pipeline, Step Functions, Lake Formation, CloudWatch, CodePipeline, IAM, DynamoDB, KMS, Secrets Manager

Big Data Technologies: Apache Spark, Apache Hadoop, ETL/ELT

Other Technical Skills: AWS Infrastructure Services, Data analysis, Data-driven decision-making, SQL complex queries, Joining datasets, Excel, macros, index, Data warehousing, Data modelling, pivots, lookups, VBA, Business metrics, Dashboards and reporting, Root cause analysis, Insights generation, Key metrics analysis, Performance monitoring, Reporting, Cross-functional collaboration, ad hoc analysis, Operational efficiencies, Business requirements, Stakeholder engagement, Analytical abilities, Problem-solving, Documentation, Business acumen, Creativity and innovation, Attention to detail, Communication ,Fast-paced environment, Self-starter, Ambiguity handling

CERTIFICATION

Microsoft Certified: Power BI Data Analyst Associate
Data Analytics Essentials - Cisco
Six Sigma Green Belt
Aws Data Engineer - Associate
Tableau Desktop Specialist
Certified Scrum Product Owner - scrum Alliance
Certified Associate in Project Management - PMI

EDUCATION

North Carolina State University — **Raleigh, NC**
Master of Engineering Management (Concentration in Data Science and Analytics) — **Jan 2023 - Dec 2024**
Sreenidhi University — **Hyderabad, India**
Bachelor of Science in Information Technology

PROFESSIONAL EXPERIENCE

Cloud Pharmaceuticals **Jul 2025 - Present**
Business Analyst

- **Led AI infrastructure investment analysis** by gathering system and financial requirements, evaluating **5+ GPU hardware vendors**, and performing detailed **cost-benefit modeling**, enabling **accurate cost forecasting and executive-level investment decisions**.
- Analyzed and optimized data center configurations including GPU utilization, power, and cooling metrics, which reduced projected infrastructure costs by **15%** and **improved compute resource allocation**.
- **Developed scalable cost models and capacity plans** for **AI workload deployment**, aligning compute, storage, and networking needs to **support high-performance AI training environments**.
- **Collaborated with cross-functional teams** across engineering, finance, and procurement to **standardize infrastructure evaluation criteria**, ensuring **consistent vendor benchmarking and ROI transparency**.
- Delivered **executive-ready** reports and dashboards summarizing infrastructure scenarios and performance trade-offs, **accelerating leadership approvals** and **driving data-driven investment decisions**.

Volvo Group **Jan 2024 - May 2024**
Data Analyst

- **Led a team of 4 analysts and engineers** to design, develop, and deploy **ML-driven forecasting solutions** using **Python, Power BI, and SQL**, improving collaboration and accelerating delivery by **20%.**
- Developed and productionized **a neural network model** using **500K+ shipment records** to forecast logistics volume and cost, achieving **0.16 RMSE** and boosting **forecast accuracy by 60%.**
- Built and deployed interactive **Power BI dashboards** integrated with predictive analytics, **reducing stockouts by 80%** and enhancing operational visibility.
- Enhanced **data reliability by 30%** through advanced **ETL automation, validation, and transformation** using **SQL, Excel, and R**, ensuring accurate **KPI reporting** and data-driven decisions across the supply chain.

NC State University **May 2023 - Dec 2024**
Facilities Admin

- Managed housing facility operations by coordinating **maintenance requests, vendor services, and room inspections**, ensuring **timely resolution of 95%+ resident work orders** and maintaining a safe, functional living environment.
- Streamlined housing operations and reporting **by** implementing digital tracking systems and maintenance schedules**, reducing** response times **by 30% and improving** communication between residents, staff, and facilities teams**.**

Accenture **May 2019 - Dec 2022**
Data Analyst

- Delivered **20 interactive Power BI dashboards** across finance and operations by integrating real-time KPIs and automating refresh cycles, **improving reporting turnaround by 40%** and enhancing leadership visibility.
- Built and maintained **15 automated ETL pipelines** using **SQL and Power Query** to integrate data from SQL Server, APIs, and Excel, **reducing manual effort by 50%** and improving data reliability.
- Optimized **100 SQL queries** using **CTEs, joins, and window functions** to analyze **10M+ rows of data, boosting query performance** and **accelerating insights** for business users.
- **Led UAT for 8 global business units** by coordinating test scenarios, documenting issues, and collaborating with cross-functional teams, **reducing post-deployment defects by 35%.**
- Translated **100 business requirements** into structured **data models, DAX measures, and BI reports**, ensuring alignment between **stakeholder KPIs and organizational objectives**.
- Developed **Excel-based prototype dashboards** to visualize early-stage KPIs, **cutting approval cycles by 30%** and accelerating dashboard deployment timelines.
- **Migrated 12 legacy datasets to Power BI** through automated mappings and transformations, **achieving 100% data accuracy** and **reducing refresh latency by 45%.**
- Enforced **data governance standards** and version control across BI assets, ensuring **data accuracy, consistency, and compliance** in all Power BI and SQL-based reporting systems.
