Seasoned Application / Production Support Professional

- ❒ Senior Technical Professional with **over 9 years** of overall career comprising over 7.4 years of IT experience specializing in Application Support, Production Support, and Maintenance Projects and 2.8 years in Developer Role in Healthcare Project.
- ❒ **Proven track record of managing complex technical issues**, optimizing application performance, and enhancing operational efficiencies.
- ❒ **Extensive experience in managing and resolving high-priority technical incidents and service requests,** ensuring minimal disruption to business operations.
- ❒ **Strong ability to implement and maintain RPA solutions** to automate repetitive tasks, resulting in reduction in manual processing time.
- ❒ **Expert in providing end-to-end support for critical business applications**, ensuring optimal performance and availability.
- ❒ Proficient in diagnosing and **resolving application-related issues,** related to SQL databases and integration points. Advanced knowledge of SQL querying, database administration, and performance tuning. Implemented **SQL and T-SQL queries** as per report design and development related requirements of the project.
- ❒ **Used Jira and Azure DevOps** to manage bugs, track issues, and create requests to monitor progress.
- ❒ Support AD based and out of the box applications onboarding by performing testing and resolving the issues.
- ❒ Expertise in **Risk Management within the Financial domain and support AD based activities (IAM, OneVault, SailPoint)** accompanied by strong technical and problem-solving skills.
- ❒ Strong background in leading support teams, implementing automation solutions, and ensuring data integrity.

SKILL-SET

Technical Support • Application Support • Production Support • Robotic Process Automation (RPA) • SQL Database Management • Problem Solving • Communication Skills • Incident & Change Management • System and Application Performance Tuning • SFTP • Bug Fixing • Team Leadership • SRE

EDUCATION

- 2012: **BE (ECE)** | TJ Institute of Technology, Chennai | Anna University

TECHNICAL SKILLS

- **Technologies:** SQL Server, T-SQL, Unix, Linux, UIPath, and Incident Management, SRE (Site Reliability Engineer)
- **Databases:** Microsoft SQL Server 2008 / 2012
- **Reporting Tool**: MS - EXCEL
- **Operating Systems:** MS Windows Server 2008, MS Windows

WORK EXPERIENCE

Standard Chartered Global Business Solutions Pvt. Ltd. | Document Reviewer (Technical Support) | May 2022 – Aug 2024

Project: Banking Domain – Intellibot RPA Process & Application / Production Support

Key Responsibilities:

- Monitoring applications and systems in production to detect and resolve issues promptly.
- Responding to and troubleshooting incidents and outages to ensure minimal disruption to services.
- Collaborating with development teams to manage code deployments in different environments, software updates, and fixes.
- Creating and maintaining documentation for **support procedures, system configurations, and incident resolutions**.
- Conducting root cause analysis for production errors and developing long-term solutions to prevent re-ocurrence.
- Ensuring compliance with SLAs and managing escalation processes when necessary.
- Managing and maintaining production support tools, scripts, and databases to ensure optimal performance.
- Experience in **system analysis** and problem-solving skills, **knowledge of database management and SQL queries**.
- Proficiency in **EPIC Systems** & strong understanding of **software troubleshooting methodologies**.
- Experience in **SRE activity** with vendor partners to test and seamlessly rollout critical system patches with zero downtime.

- Verified documents for deployment activities and related tasks through the **Intellibot Orchestrator tool** based on user requests.
- Implemented end-to-end **Robotic Process Automation (RPA)** using the Orchestrator.
- Configured bots, deployed processes, and scheduled jobs in the IB Orchestrator.
- Managed VDI activities, including procurement, tagging/untagging, and decommissioning.
- Tracked and created incidents and changes using the **ServiceNow** platform.
- **Utilized Jira and Azure DevOps** to assist teams in managing bugs, tracking issues, and creating requests to monitor progress.
- Responsible for following the Change Management process for deploying the BOT changes.
- Support GO-Live activities round the clock.
- Perform smoke test and sanity checks in PROD Environment.

SourceHOV (Exela Technologies India Pvt. Ltd.) | Software Engineer | Sep 2019 - May 2022

Project: Healthcare Domain
Key Responsibilities:

- Analyzed and modified project needs based on requests received from the BA team.
- Created and modified project rules using the **KomodoFCB tool**.
- Developed and analyzed stored procedures in **SQL Server** to address issues reported by the respective team.
- Notified critical incident management of high-priority issues promptly after gathering necessary information for escalation.
- **Monitored production-related issues** and resolved them immediately.

Novac Technology Solutions (Formerly Shriram Value Services) | Technical Engineer | Sep 2014 - Sep 2019

Project: Ultimate Non-Banking Operations and Accounting System (UNO)
Key Responsibilities:

- Ensured qualitative remote resolution of incidents and proactively reduced the number of incidents and tickets.
- Granted user-related access for **application support.**
- **Traced and fixed bugs** in stored procedures using SQL Profiler.
- Created and executed stored procedures, including tables, joins, views, and CTEs.
- Contributed to database and support teams by performing data migration, back-end development, code automation, and product support.
- **Managed application support and testing duties** to comply with financial standards.
- Notified critical Incident Management of high-priority issues promptly after gathering required information for escalation.

Sri Amman Wind Systems Pvt. Ltd. | Service Engineer | Jun 2012 - Jun 2014

Key Responsibilities:

- **Oversaw production, quality analysis, and servicing** of wind mill boards and other types of boards.
- Designed, implemented, and monitored effective procurement schedules, finalized material specifications, and established quality and quantity standards.
- Identified, analyzed, and resolved issues promptly.
- Monitored the production simulator and assessed quality and performance.
- Maintained and supervised overall records related to production and service activities.
- Assembled components on PCB boards and performed soldering tasks.
